Note:

- The requirements of above supporting documents shall be reviewed in accordance with the contract's technical specifications and the programme Assurance Minimum Standards. Where other supporting documents are required but not in the list, it shall be provided under "Others".
- The material submission shall be to the satisfaction of the engineer that the material offered is equal or superior to and fully comply with the material specified in the contract's technical specification. If full supporting documentation is not available at the time of submission, the contractor shall indicate on this form when the respective documentation will be available for formal submission to the engineer.
- The material approval process is explained in the PMDS Activity Guide Material Submission (Ref. 05007-ATG-

| P990000-QL-000004). | |
